

Estericlean[®]

STERILE OVERWRAPPED IRRIGATION FLUID

Estericlean® 3 Step Handling Guide

SPECIFICALLY DESIGNED FOR USE IN THE OPERATING ROOM

The overwrap guarantees the sterile surface of the Estericlean containers

1. Peel back the overwrap, partially revealing the sterile container

2. Ensure a sterile person removes the container and places it in the sterile field

3. Open the container by simply twisting off the cap. Estericlean is now ready to use

Product Name	Estericlean®
Description	NaCl 0.9% Estericlean® EL 500ml
Size	500 ml
Product Code	3570460
EAN Code	4030539076784
UOM	Kar 10

Are You Compliant?

STAGE THREE DIRECTIVE - ARE YOU STILL USING OPEN SYSTEMS FOR MEDICATION? (I.E. JUGS & GALLIPOTS)

PATIENT SAFETY ALERT

The patient safety agency released a stage three directive surrounding the use of injectable medications. This is following 2 previous alerts and an incident in which a stain antiseptic was mistakenly injected and resulted in a limb amputation. This was down to the historic practice of using **open systems** in theatres.

It is clear from this alert that the two main issues with open systems are maladministration and risk of contamination.

Be compliant and choose B. Braun Medical Estericlean® irrigation solution. Estericlean is a patient safety alternative to standard irrigation pour bottles.

Features	Advantages	Reduces the risk of		Increases efficiency
		Maladministration	Contamination	
Sterile Overwrap	<ul style="list-style-type: none"> For use within a sterile field No need to decant solution into jug No open system necessary 	✓	✓
